

# Cyclope Enterprise Printer Monitor

**Cyclope Enterprise Printer Monitor** allows companies to **monitor, record and report individual usage within their printer network.** From recording data about the employee commissioning each print, to the number of pages in each print job, effective print management is made easy, thanks to Cyclope Enterprise Printer Monitor. The application records all the details of printing jobs across the monitored network, whilst acting to **promote efficiency** through highlighting particular areas of concern or **improvement from a cost perspective.**

Encompassing all computers, users and printers, **Cyclope Enterprise Printer Monitor** allows manager to analyze at a glance **efficiency over a specified period of time.** The effective monitoring solution has been designed with a view of **reducing printer costs and increasing profits.**

# Cyclope Enterprise Printer Monitor

## Taking control

The far reaching tracking capabilities controlled from a single, central control panel allow users to actively engage with the aggregated period statistics and ensure strict network printer control. The Cyclope Enterprise Printer Monitor web interface is a particular strong point, designed firmly with the end user in mind. The interface can be accessed from any location within the local area network by the administrator, delivering accurate aggregated statistics where and when they are required.

## Reporting

The reporting function of Cyclope Enterprise Printer Monitor generates reports on each monitored printer and user. Accessible from the central control panel, the reports can even be sent to a specified address to ensure greater availability of information as and when it is required.

Encompassing tracking, logging and documenting functions, Cyclope Enterprise Printer Monitor is an all-inclusive print management software package presenting the ease of use and flexibility necessary to run and successfully monitor printers, users and computers within a dynamic organization.

Cyclope Enterprise Printer Monitoring brings increased efficiency and control of your networked printers, allowing effective management of printing costs whilst identifying key problematic areas to drive a net increased profit through minimizing related expenditure. The benefits that come with the Cyclope Enterprise Printer Monitor - printer management software - range across its three main functional areas: **monitoring**, **recording** and **reporting**.

# Accurate and detailed statistics

Date	Time	Computer	User	Document	Printer	Printer User	Pages	Copies
010/08/2007	16:13	PLUS	Dan Gurchian	http://192.168.0.10:8777/scripts/pg=loginfc=login	PDF995	Dan Gurchian	1	1

## Features

- **Monitors All Printers**  
Monitors all printers within the specified network, allowing management of printer load and printing activities within your organization.
- **Record Print Job Details**  
Cyclope Enterprise Printer Monitor records all possible data relating to a printing job: the date and time of printing, the printer name, the user requesting the print, the computer the request was made from and the number of pages in each job, arming the administrator with key evidence in identifying and eradicating staff abuse.
- **Provide Reports on Printers, User and Computers**  
Cyclope Enterprise Printer Monitor creates reports for all monitored printers, computers and staff within the specified network. Reports can also be viewed in a printing-friendly manner.
- **Aggregated Period Statistics**  
Statistics cover users, computers and all monitored printers spanning variable timeframes to give a clearer idea of printing activities and manage network printers more effectively.
- **Easy to Use Web Interface**  
The user interface allows for easy navigation to assist overall network print management and give the administrator unrivalled network printer control.
